### **Capping of notional amount**

4. If the rounded notional amount, as determined under item 3, of a derivative referred to in item 1 exceeds the capped rounded notional amount, in Canadian dollars, according to the asset class and maturity date less execution time stamp date set out in Table 4 for that derivative, a recognized trade repository must make available to the public the capped rounded notional amount for the derivative in place of the rounded notional amount.
5. When making transaction-level data for a derivative to which item 4 applies available to the public under subsection 39(3) of this Instrument and in accordance with this Appendix, a recognized trade repository must state that the notional amount for the derivative has been capped.
6. For each derivative referred to in item 1 for which the capped rounded notional amount is made available to the public, if the data to be made available to the public includes an option premium, the recognized trade repository must adjust the option premium in a manner that is consistent with and proportionate to the capping and rounding of the reported notional amount of the transaction.

**Table 4**

<b>Asset Class</b>	<b>Maturity Date less Execution Time Stamp Date</b>	<b>Capped Rounded Notional Amount in Canadian Dollars</b>
Interest Rate	Less than or equal to two years (746 days)	\$250 million
